Acoustic Ceiling Panels Collection

Mosaic Acoustic Ceiling Panels ↙

—   Content

LookUp™

Acoustic ceiling panels combining sound absorption with modern design. Easy to install, ideal for commercial interiors, especially offices, ateliers and shops.

Why LookUp?

› Thoughtfully designed with a focus on aesthetics

› Made from recycled PET felt

› Modular formats & tileable patterns

› Create custom compositions — your wall, your rules

› Meets sustainability and quality standards

Origin

Born from our own office needs — designed to enhance acoustics and well-being with aesthetic impact.

LookUp™ Collection was designed with creativity and freedom in mind. Mix and match our patterns and colors to create a truly unique space.

Change your ceiling into an experience with LookUp™

Installation Guide

PET panels designed for installation in LookUp ceilings do not require additional tools, which makes both installation and replacement much easier.
① Carefully insert the ceiling panel at an angle into the grid opening. Make sure all edges of the panel are above the suspended frame.

② Gently lower the panel so it rests on the grid. If it doesn't sit evenly, lightly tap certain areas to help it settle into place.

54-615 Wrocław, Poland

Please note that the actual appearance of DeFelt felt products may differ or vary slightly from the images shown in the catalog. This is because each type and batch of felt and fabric has its own unique characteristics. We view this as an advantage for each product is unique and unrepeatable. Keep in mind that the colors of PET, felts, and fabrics may vary slightly from what you see in the catalog. For the most accurate representation, we recommend referring to our sample book or sample individually sent.

Due to the production process of both fiber and PET felt, there may be slight variations in material between different production batches. Additionally, please take into consideration that PET panels have distinct left and right sides so always try to present only one side of the sheet. Due to the manufacturing process, the felt board may show differences in shade depending on the direction of laying. We recommend laying all pieces in one direction to avoid undesirable visual effects.This is particularly important to consider when installing larger structures, such as wall-mounted panels or acoustic drop ceiling.
